**Hazardous Decomposition Materials:** phosphorus oxides, phosphine (PH<sub>3</sub>)

**Special Procedures:**

**Fire-Fighting Instructions:** Keep personnel removed from and upwind of fire. Wear full fire-fighting turn-out gear (full Bunker gear) and respiratory protection (SCBA).

**Personal Protective Equipment:** Wear full fire-fighting turn-out gear (full Bunker gear) and respiratory protection (SCBA).

#### Section 6: Accidental Release Measures

**Procedure to be Followed in Case of Leak or Spill:** Evacuate Area

**Spill and Leak Personal Procedures:** Wear appropriate protective chemical resistant clothing and chemical resistant gloves to prevent skin contact. Consult the glove/clothing manufacturer to determine the appropriate type glove/ clothing for a given application. Wear chemical goggles, and a face shield; use of a NIOSH/MSHA approved respiratory protection equipment with full face piece (use of a full face piece replaces the need for face shield and/or goggles).

**Containment of Spill:**

**Small Spills:** Neutralize acid spill with alkali (a base) such as soda ash or lime. Absorb material with an inert and place in chemical waste container to be disposed at an appropriate waste disposal facility according to current applicable laws and regulations and product characteristics at time of disposal. Adequate ventilation is required for soda ash due to the release of carbon dioxide gas. **No Smoking In Spill Area.**

**Large Spills:** Contain large spills with dikes and transfer the material to appropriate containers for reclamation or disposal. Absorb remaining spill material with an inert material and place in a chemical waste container to be disposed at an appropriate waste disposal facility according to current applicable laws and regulations and product characteristics at time of disposal. Neutralize residue and washings with alkali (a base) such as soda ash or lime. Flush residual spill area with large amounts of water. Adequate ventilation is required for soda ash due to the release of carbon dioxide gas. **No Smoking In Spill Area.**

**Cleanup and Disposal of Spill:** Dispose at an appropriate waste disposal facility according to current applicable laws and regulations and product characteristics at time of disposal.

**Environmental and Regulatory Reporting:** See Section 13 for disposal information and Sections 14 and 15 for regulatory requirements. Large and small spills may have a broad definition depending on the user's handling system. Therefore, the spill category must be defined at the point of release by technically qualified personnel.

**Section 7: Handling and Storage**

**Minimum/maximum Storage Temperature:** no data

**Handling:** \*Do not get in eyes, on skin or on clothing.

\*Avoid breathing mist or vapor.

\*Do not taste or swallow.

\*Keep container closed.

\*Use only with adequate ventilation.

\*Wash thoroughly after handling.

\*Empty container retains vapor and residue.

\*Observe all label safeguards until container is cleaned, reconditioned or destroyed.

Transfer product from drums to process in closed system (hermetically) if not possible use effective local exhaust ventilation. Empty drums as thoroughly as possible to facilitate disposal. For bulk transfer, purge lines with nitrogen to remove residual liquid before disconnect. When unloading bulk vehicles, personnel should wear chemical goggles and rubber or neoprene gloves. All fittings should be properly secured prior to energizing unloading system. Care should be taken to avoid acid contact when disconnecting lines/hoses after unloading.

**Bulk Storage:** For bulk storage **TYPE 316L STAINLESS is recommended.** Glass, polyethylene and FRP (depending on resin used) are satisfactory. **Steel, aluminum and type 304 stainless are not recommended** because of rapid or potential corrosion. Vessels should be vented and operated at ambient conditions. Maintenance heat (hot water preferred) may be used to prevent freezing. Dike area around storage tank with sufficient volume to hold entire tank contents.

**Storage:** Store in plastic, rubber-lined, or 316 stainless tanks designed for H<sub>3</sub>PO<sub>4</sub>. Store drums away from heat and out of direct sunlight. Store in a well ventilated, dry area away from Alkalis and most metals. Store above freezing point. **Contact with reactive metals, i.e. mild steel and aluminum may generate hydrogen that may form an explosive mixture in storage vessels.**

**REGULATORY REQUIREMENTS:** See Section 8 for employee exposure controls and Section 14 and 15 for other regulatory requirements.

**Section 8: Exposure Controls / Personal Protection**

**Ventilation Protection:** Provide natural or mechanical ventilation to minimize exposure. The use of local mechanical exhaust ventilation is preferred at sources of air contamination, such as open process equipment. Consult NFPA<sub>s</sub>z standard 91 for design of exhaust systems.

**Respiratory Protection (specify type):** Avoid breathing vapor or mist. Wear NIOSH/MSHA approved respiratory protective equipment (full face piece recommended) when airborne exposure limits are exceeded (**see Section 2 for OSHA-PEL and ACGIH-TLV-STEL limits**). If used, full face piece replaces the need for face

**Eye Protection:** Wear chemical goggles, face shield and chemical resistant clothing (if used, full face piece replaces the need for face shield and/or chemical goggles). **Have Eye Flushing Equipment Immediately Available.**

**Skin Protection:** Wear appropriate protective clothing and chemical-resistant gloves to prevent skin contact. Consult the glove/clothing manufacturer to determine the appropriate type glove/clothing for a given application. Wear chemical goggles, a face shield, and chemical resistant clothing. Wash immediately if skin is contaminated. Remove contaminated clothing promptly and launder before reuse. Clean all protective equipment before reuse. **Have a Safety Shower Immediately Available.**

**Other Protective Clothing and Equipment:** Provide a Safety Shower and Eye Wash Facility where skin or eye contact may occur.

**Hygienic Work Practices:** Clean protective equipment before reuse. Wash thoroughly after handling. Wash clothing and thoroughly clean shoes before reuse.
